GREAT INNOVATIONS

FOR THE SPA AND WELLNESS SECTOR

A tireless inquiring mind, the courage to try something new, the ability to look outside the box and unconventional ideas: these are the foundations for spa and wellness treatments of the future. At Kurland we recognised this spirit of the age decades ago and took a pioneering role in terms of spa innovations.

With exceptional worlds of emotions, patented equipment and systems from Haslauer that have familiar names like Soft-Pack®, Sabbia Med®, Salve-in-terra® or Rasul®, we have been livening up the market for 50 years now and offering a repertoire for wellness, spa and health facilities that is far removed from well-known standards.

From innovative products to totally new unprecedented systems, we reinvent the future in the wellness and spa sector time and time again. With the knowledge in mind: modern, medical wellness must have a holistic, tangible effect today. It's not just the body that should relax but the mind and soul must also wind down.

We work hard on implementing new technologies and always bear your

success and the needs of your guests and customers in mind in the process. However, innovation is not the only thing by far that matters in this sector. Energy efficient, economical products and systems with sustainability are important. These essential aspects are also given top priority when planning, designing and implementing our services and products.

We also don't make life easy for ourselves in terms of design. Even though glass and stone are currently trendy in the spa sector, we focus on individuality. Our motto is, "You ask, we supply". You can be assured that you receive customised products from us that are tailored to your establishment's requirements and style.

Kurland Spaworlds launches products on the market today that become the standards of tomorrow. We have already received multiple awards for this commitment, for example with the European Health & Spa Award for the best technological spa innovation. For us this is confirmation that we are on the right track with our flair for innovative systems and equipment.

We are proud that we have been taking a pioneering role in the spa and wellness sector for years and will continue to stir up the market in future with revo-

lutionary inventions that will make your establishment something really special. Trust our decades of experience and the special service that you enjoy from us. As cooperation does not end for us with the purchase of one of our services or products. With Kurland you always have a strong, reliable partner by your side.

In this brochure you can find our current offers that we can completely tailor to your ideas. In addition: you can also lease all our equipment. Simply ask our Spa Design team about the variety of options.

We also offer you a wide range of care products for the individual systems and equipment, for example precious oils, cremes or healing muds. You can find more information about these on page 60 or in our online shop: www.kurland.info

We hope you enjoy discovering what we currently offer you and look forward to turning your ideas into a reality with you.

OUR INNOVATIONS

LATHERING SYSTEM FOR RASUL® AND STEAM BATHS

On request, we will equip your Rasul® or steam bath with our lathering system. As a result you can offer your guests not just Rasul® and steam bath treatments in one and the same room but also a Hamam lathering treatment. **More on page 11 and page 22.**

SOFT TOUCH STREAM JET TECHNOLOGY

The well-established Soft-Pack® system can now also be equipped with the innovative "Soft Touch" stream jet technology. This gently massages the shoulders and back with a water jet while the guest relaxes on the table. Well-being can be improved considerably during the treatment with this extra function. **More on page 39.**

SAVAR SINNESPHONIE SOUND CUBE

Music can not only be heard but also felt with the savor Sinnesphonie sound cube. The heartbeat is slowed down by the oscillations and vibrations of the arrhythmic sound sequences, which leads to deep relaxation and a wonderful feeling of security. Idea for well-ness treatments and relaxation areas. **More on page 39.**

BODY CONCLUSIO

Our Body Conclusio is also often called the smallest steam bath in the world and can be used wherever you want it to be. Castors make it mobile so it can be used anywhere. Herbal and Swiss pine shaving packs combined with damp heat pamper the back area and stimulate the limbic system due to the special fragrance. **More on page 40.**

SWISS PINE LOUNGER

The Swiss pine lounge is a comfortable sitting niche. The wonderfully warm steam and fragrance of the precious Swiss pine shavings that rises as soon as the guest sits on the heated seat relaxes the whole back and also provides inner peace, improves physical and mental resilience and is good for concentration problems. **More on page 42.**

RELAXATION AND MASSAGE TABLES WITH INFRARED FUNCTION

Some of our relaxation and massage tables, e.g. the Saviour Touch model, can also be fitted with an infrared system that is targeted at the spine, on request. As a result, your guests can not only relax wonderfully but also improve their health and do something good for musculoskeletal pain or back problems. **More on page 50.**

SALVE-IN-TERRA®

A SENSUOUS SKINCARE EXPERIENCE

Salve-in-terra® – awarded with the Health Spa Award as the best technical spa innovation – is a wellness system that not only provides skincare treatments but also entices your guests into a world of emotions.

With Salve-in-terra® the wellness experience for couples is taken to a whole new level. Closeness, feeling, touching and rediscovering your partner's beautiful qualities are the focus with this spa treatment.

Once the setting has been adjusted totally to the couple's requirements with seductive scented oils, images, lighting effects and atmospheric music, the actual treatment on the heated bed can begin. Skincare products, e.g. a warm creme peel or blends with caviar or truffles are applied to the body.

The relaxing swaying of the bed enables your guests to gently slide back and forth, resulting in gentle contact while the applied products work their magic on the body.

Just before the end of the treatment the couple can treat themselves to a very special experience. The sides of the bed are folded up like a clam. For a brief moment of intimacy the bodies slide up close to each other. The skin is then cleansed with a warm tropical rain shower or a refreshing ice rain shower, whichever your guests prefer.

Useful information

Automatic bed and room cleaning programme:
Guaranteeing low personnel costs.

Individually adjustable programme:
Tropical or ice rain shower at the end of the treatment. Option of joining together or not. The duration, steam production and much more can be individually adjusted.

Easy to install:
The system is installed quickly and ready for your guests to use in just a few days.

Integrated hand showers:
Two hand showers are integrated in the cabin so it is not necessary to have any external showers in the ante room.

Pleasant to lie on and good sliding properties:
The special surface of the Salve-in-terra® makes it pleasant to lie on and ensures good sliding properties – regardless of your guests' stature.

Tasteful lighting:
Mood lighting effects with Swarovski crystals, spotlights and coloured lights are possible.

Music selection using savor sound cube:
With the sound cube guests can select from a whole range of music genres, from classic to modern and even change these during the treatment (more about this on page 39).

Different treatment products:
From algae to moor mud to the special Kurland Salve-in-terra® creme peel (more about this on page 9).

RECIPES FOR SALVE-IN-TERRA®

A WHOLE VARIETY OF POSSIBLE TREATMENTS

Herbs, oils, cremes, muds, moor mud or algae: All the natural healing products are ideal for application in Salve-in-terra®.

How about, for example, a moisturising goats' butter creme bath, popular due to its skin refining, nourishing, energising and anti-inflammatory properties? Or a luxurious aphrodisiac treatment with caviar and precious truffle extract? Algae or Rügen healing chalk are ideal for skin; guests feel fresh and revitalised after this treatment.

Ask us about the many treatment options in Salve-in-terra® and how the individual products affect the body, mind and soul.

Moisturising, stimulates the metabolism, purifying, stimulates cell renewal, relaxes muscles, cleansing, anti-inflammatory, soothing or stimulating: at Kurland there is an incredible variety of products for this unique system. You can also find more information online at: www.kurland.info

A HIGHLIGHT FOR ANY SPA

SALVE-IN-TERRA® IS ALSO SUITABLE FOR THE SMALLEST AREAS

Besides the automatic room cleaning programme, the system's durability as a result of the robust, glass fibre reinforced plastic surface (GRP) and low personnel costs, we mainly placed great importance on the variety of possible uses with Salve-in-terra®.

This not only means many different treatments are possible in the system (see next page) but the Salve-in-terra® with acrylic glass cabin can also be perfectly integrated into the smallest wellness and spa areas and become a highlight at your establishment.

There is of course also the option of installing Salve-in-terra® without a cabin in a special easy to clean room. Simply ask us about the variety of options.

Although the focus is on wellness for couples with Salve-in-terra®, treatments can of course also be carried out for singles or friends and it is an experience that your guests will remember for a long time to come.

Mercure Krynica Zdrój Resort & Spa, Krynica Zdrój/Poland

RASUL®

ORIENTAL CLEANSING AND SKINCARE CEREMONY – THE ORIGINAL FROM HASLAUER

Seduce your guests into a dream from "One Thousand and One Nights". In the Rasul®, an invention by the wellness pioneer Paul Haslauer, not only is skin pampered and perfectly cared for but your mind and soul can also let go.

Wellness pioneer Paul Haslauer has turned a thousands of years old Oriental cleansing and skincare ceremony into a modern system that has become an essential element of many spa businesses: the Rasul®. The Oriental ambience of the Rasul® alone will impress your guests. Ornately painted, handmade ceramics, spectacular colours, towering minarets and a deceptively real looking starry sky entice you into a world from "One Thousand and One Nights".

What the skincare ceremony involves: following a short cleansing shower,

healing muds are applied to the body and slowly dry in the Rasul®. The room is then heated up and humidified. Mists of steam float through the room, accompanied by the subtle fragrance of herbs with soft music playing in the background. Guests snuggle into the ergonomic heated seats and enjoy the sensation of the warmth and atmosphere in the Rasul®.

The muds on the body become damper again thanks to the humidity in the room and can be rubbed. The effect: dead skin is gently removed and the metabolism is stimulated. The experience in the Rasul® ends with a warm tropical rain

shower that washes the muds off the body. Leaving skin feeling moisturised and silky soft. However, the Rasul® from Kurland can also do a lot more. It's not just treatments with special Rasul® muds that are possible. We will also be happy to equip your system with a lathering system for Hamam soap lather massages, on request. Ask us about treatments with precious creme and steam bath peels, muds, soap or chalk too.

By the way, it won't be just your guests who love the Rasul®, your personnel will be happy too. As the system is so easy to clean that you could almost say it does it automatically.

Useful information

Steam-proof cabins:

Completely steam-proof cabins made from GRP, consisting of a floor assembly, walls, seats and dome.

Comfortable seats:

The GRP seats are ergonomic as well as being easy and quick to clean. A special feature is the heating that reaches as far as the upper back area.

Washbasin:

Washbasins are integrated into the seats' armrests, which provide fresh water. Guests can therefore wash their hands after applying the muds.

Open pipework through sedimentation basin:

A sedimentation basin is integrated in the floor assembly, which collects the mud and other products.

A perfect room climate:

An ideal room climate is guaranteed due to the recirculation of heat at intervals.

Easy to maintain:

Setting programmes, software updates and troubleshooting are done conveniently and quickly through our technology department by phone.

THE RASUL®-DESIGN

TRADITIONAL AND ORIENTAL OR MODERN AND UNUSUAL?

In the Rasul® it's not just a unique skin care ceremony that awaits your guests but there is also plenty to please the eye. The system's design can be tailored totally to your personal requirements.

Classic with handmade ceramics in Oriental colours and with a sparkling starry sky: that's the traditional Rasul® modelled on the Orient. It is extremely popular as a result of its authenticity and is the closest you can get to the original concept of a Rasul®. Even before they enter the Rasul®, guests are captivated by the Arabian flair: an opulent domed roof,

Oriental fountain, elaborately wooden carved doors and a handmade ceramic floor painted with a great love of detail make the spa treatment an experience from the very first minute.

Naturally, other design versions are also available besides the classic model. Modern and with clear lines, in Mediterranean or Asian style or to follow current trends, for example in a Zen look or natural design that skilfully plays with organic elements: whatever you want your Rasul® to look like, we have a large selection of a whole range of designs.

RASUL® FOR FOUR PEOPLE

OUR CLASSIC

The Rasul® design with four seats is ideal for medium and larger spa and wellness areas. Here your guests can relax in a small group and let the precious muds or other products, such as soap lather, work their magic.

The 4-seater Rasul® provides plenty of space for your guests and therefore gives every single user enough room for themselves. Each seat has its own washbasin.

There are of course no limits when it comes to your requests for design and colour. Modern, unusual, minimalist with clear lines – anything is possible.

Besides the 4-seater Rasul® larger Rasul® versions are also possible, for example for seven people. Ask us about possible customised designs.

RASUL® FOR TWO PEOPLE

RELAX IN AN INTIMATE ATMOSPHERE

Montenegro Stars Hotel Splendid 5* Conference & Spa Resort, Budva/Montenegro

Hotel Golden Residence, Madeira/Portugal

Messe Professional Beauty 2009, London/Great Britain

The experience in the Rasul® can also be enjoyed as a couple in a private atmosphere. If you do not have much room in your spa, we highly recommend the space-saving Day Spa version. It can also be perfectly integrated into a hotel suite.

Naturally the 2-seater Rasul® and the 2-seater Day Spa model are also possible in a whole range of designs, from traditional to modern.

RASUL®-MUDS

PRECIOUS FOR SKIN

We have a variety of high quality muds that are supplied ready to use specifically for application in the Rasul®. These are purely inorganic products from Germany that are made from pure rock flour and mixed with water. The muds can help to remove pollutants and waste from the skin, they peel and firm skin and prepare it perfectly to absorb other skincare products, e.g. warm oils.

At Kurland there is a whole variety of muds with different effects, tailored to the individual parts of the body. However, treatments with chalk, soap, creme and steam bath peels are also possible.

We will be happy to advise you in depth about our products and how to use them properly in the Rasul®. You can find more detailed information about the effects at: www.kurland.info

BRECHELBATH®

THE SPECIAL KIND OF BIO OR HERBAL SAUNA

Guests are met by a waft of the incomparable scent of fresh fir twigs as soon as they enter the Brechelbath. Added to this, the warm wood and pleasant temperatures make a stay in this historical sauna unforgettable.

The Brechelbath® has a long historical background. In former times the stalks from hemp and flax used to be dried in the scutching room where they were then broken in a special device to get the fibres out of them. The fibres were then humidified several times and scented with herbs.

The Brechelbath® based on this old tradition is also a permanent fixture in sauna complexes. Guests sit on comfortable wooden benches or individual high seats that are warmed from underneath. Fresh fir tree needles lying on the floor give you a gentle reflexology massage. There are different herbs in the Brechelbath® oven and the copper crown under the ceiling, which is filled with fir cones and twigs. The herbal steam shots in the Brechelbath®, which can be individually controlled, rise and set free essential oils from herbs, fir cones and twigs that have a positive effect on the whole being.

The temperature in the Brechelbath® is between 45° and 65° Celsius, as required. The humidity can also be set according to your guests' requirements. As a result this spa equipment is also ideal for people who do not cope very well with standard saunas.

In the summer the floor in the Brechelbath® can alternatively be covered with Swiss pine shavings. Swiss pine is calming but also mentally stimulating, it boosts concentration, promotes relaxing sleep and improves physical and mental resilience. But it is also the mild, rounded, warm fragrance of the pine that makes it so attractive.

By the way, you can also buy the individual components for the Brechelbath and install them yourself.

Useful information

Individually controllable process and energy-saving mode:

The number and duration of steam shots, ventilation time, seat and room temperature; you can choose the ideal programming yourself. There is also the Brechelbath® with integrated energy-saving mode. Here you can switch from permanent mode to the energy-saving programme mode. The system is switched on before entering the Brechelbath®.

Water preparation:

No calcifying, an almost maintenance-free system with a high level of reliability.

Programmable steam shots:

The warm air does not hang up in the air, pleasant steam shots are also moved down thanks to the circulation system.

Special copper ceiling:

This conducts the heat to the guests' backs.

Massage effect and hygiene:

The fir twigs gently massage the soles of the feet and provide natural hygiene thanks to the essential oils.

Montram Hall Spa, Macclesfield/Great Britain

STONEBATH®

AN EXPERIENCE THAT LEAVES A LASTING IMPRESSION

Hot stone, ice cold water, steam that spreads throughout the whole room: the Stonebath® is an impressive sauna that was modelled on the elemental forces that occur deep-down in the earth's core. Infusions in the Stonebath are a ceremony with entertainment you can see, hear and feel.

Guests relax at a room temperature of 50° to 70° Celsius, while massive mineral stones are heated in an oven. The heated stones are removed from the oven at regular intervals that you can choose yourself and are cooled down in a basin filled with cold water. During this spectacular process, the

sizzling stones set free their valuable minerals, which spread throughout the room in the form of aerosols and it has the same effect as an inhalation treatment. A gentle but continuous increase in humidity and room temperature is achieved through the repeated lifting and lowering of the basket during your stay in the Stonebath®. The mild over-

heating is intensified through targeted heat in the seating area.

The Stonebath® is also available with integrated energy-saving mode. Here you can switch from the permanent mode to the energy-saving programme mode. The system is switched on before entering the Stonebath®.

Hotel Hoffmeister, Prague/Czech Republic

Pleasant room temperature:

A room temperature between 50° and 70° Celsius makes the Stonebath a gentle sauna. It is ideal for people who react sensitively to high temperatures and also for children and older people.

Controlled heat shots:

Thanks to the interval-controlled ceiling ventilator, the warm air does not stay up on the ceiling, but is pushed down at specific intervals. This leads to more even heat distribution.

Show effect:

The hot stones that are immersed in the cold basin and the steam that spreads throughout the room are not just good for the body. It's really something special to watch this different kind of infusion.

Hotel Mercure Resort & Spa, Krynica-Zdrój/Poland

BREADBATH

A FRAGRANT HEAT BATH WITH FRESHLY BAKED BREAD

In former times the residual heat of the bread baking oven was used to alleviate rheumatic discomfort and also to free yourself of evil thoughts and sins. Today the breadbath is an unusual wellness facility with its wonderful fragrance.

At pleasant temperatures between 30° to 45° Celsius, the unique fragrance of freshly baked bread and mild, dry heat are wonderfully relaxing. The centre point is a big bread baking oven spreading the pleasant scent of bread while guests can unwind in

comfortable heated seats and profit from the health benefits of the wonderful fragrance too. The released sour dough enzymes have a special effect on the body. They stimulate the metabolism and help digestion.

As a result of its mild temperature the breadbath can also be used ideally as a relaxation room with a special flair or as a “starter” for subsequent spa and wellness treatments.

This system's unique bonus: your guests can satisfy their peckishness with freshly baked bread from the oven in between their individual spa and wellness treatments.

Useful information

A unique wellness bath:

Relaxing in the breadbath is a unique experience and an unusual alternative to standard heat baths or relaxation rooms.

Great before spa treatments:

As the breadbath activates the metabolism, any subsequent treatment is very effective. As a result, this heat bath is the perfect start to a relaxing spa day.

Easy to clean and maintain:

The hygienic seats, e.g. made from high quality GRP are easy and quick to clean and very durable. The bread baking oven does not require any maintenance.

STEAM BATHS

CUSTOMISED SOLUTIONS – TAILORED TO YOUR REQUIREMENTS

Pleasant and agreeable temperatures, high humidity, genuine herbal aroma, soft lights and relaxing music: your guests could not experience a better classic steam bath. The skin is supplied with blood, the respiratory passages cleansed, and the immune system strengthened. The focus is on “anything but ordinary”. As we offer you steam baths that have more than standard systems. For example, the integrated experience functions (see page 25), Hamam tables for soap lathering massages or a programme for Rasul® treatments.

The Kurland steam bath with integrated herb evaporator is the modern alternative to the Oriental steam bath, the Hamam. Our steam baths are generally equipped with a round lying surface, similar to the original from the Orient.

The interaction between beneficial steam, an agreeable temperature between 43° and 46° Celsius, high humidity, natural herbal scents and a pleasant conductive transfer of heat in the seating area guarantees your guests a pleasant, stimulating steam bath experience.

Of course, the design will be tailored to your requirements. There are plenty of options for turning your steam bath into something exceptional, e.g. integrated systems for Rasul® and soap lather treatments or special ceiling ventilators. A combination of a steam bath and Hamam is also possible, where not only soap lathering massages can take place but also peels or oil treatments. The required climate (humidity, temperature) can simply be adjusted for the function by touchscreen.

Our steam baths consist of a completely water-tight and steam-proof cabin and benches. The flooring, wall and bench tiles are tailored to the style of your establishment.

Useful information

Individually controllable programme:

Steam bath production, ventilation time, seat and room temperature: you can choose the ideal room climate yourself.

Water preparation:

No calcifying, an almost maintenance-free system with a high level of reliability.

Mood lighting:

Coloured light bars or a starry sky with Swarovski crystals: light creates a very special mood. Choose from many possible options.

Treatments while in the steam bath:

Additional sales due to peels or salt treatments in the steam bath.

Genuine herbal aroma:

Our steam system allows for the use of real herbs.

STEAM BATH EXPERIENCES

SYSTEMS WITH EXCEPTIONAL EXTRAS

Make more of your steam bath and offer your guests a real experience with special highlights, e.g. ventilators, snowflakes falling from the ceiling, mist sprays, romantic, fancy lighting arrangements, Hamam flair or multi-functional steam baths, where even Rasul® treatments are possible.

One extremely popular version is the steam bath experience with integrated final cool-down.

First of all the body is exposed to successive heat shots. The temperature in the cabin rises continuously.

Before the guests leave the steam bath again, they are refreshed with tingling ice crystals or cool rain. As the cool-down is automatic and guests do not have to take care of refreshment themselves after sweating, for example in the sauna or standard steam bath, there is also less risk of them not cooling down sufficiently. This is gentle on the cardi-

ovascular system and strengthens the immune system.

If you already have a usual steam bath and would like one or two “experience effects” for your system, we will be happy to equip it with additional features based on your requirements.

Ice or mist jets, ventilators, snowflakes falling from the ceiling or extravagant lighting arrangements, for example magical lighting with Swarovski crystals: simply ask us about the variety of options.

SAUNAS

CUSTOMISED SYSTEMS FOR YOUR ESTABLISHMENT

70° to 100° Celsius and a relative humidity of 3 to 8 percent: in the classic, Finnish sauna, which has a centuries-old tradition, your guests will find an oasis of relaxation where they can do their health a power of good.

You do not receive off-the-peg saunas from us but customised solutions that are tailored to your requirements. The systems can be operated with different functions, for example as a classic Finnish sauna but also as a bio sauna, vitalising herbal bath or hot air bath, always with different temperatures and humidity.

The seats are generally arranged in tiers around the sauna oven. The oven can be placed along a wall but also in the centre of the sauna and covered with different materials – we

also adapt totally to your ideas here. With the interval-controlled ventilator in the sauna's ceiling the hot air does not stay on the ceiling but pleasant heat shots are also pushed down. The climate in the sauna is pleasant and even thanks to the perfect circulation of ambient air.

You can choose from many types of wood (for example, spruce, hemlock, waste wood) for your sauna. There is no limit when it comes to requests for design too. Rustic and traditional or modern and unusual: anything is possible.

Montenegro Stars Hotel Splendid 5* Conference & Spa Resort, Budva/Montenegro

Different functions

For example, Finnish sauna, bio sauna, vitalising herbal bath, vitalising steam bath or hot air bath

Individual design – made in Germany

Any design is conceivable: from rustic to minimalist. Our saunas are made in Germany.

Interval-controlled ceiling ventilator

Programmed heat shots for the perfect circulation of ambient air and ideal climate in the sauna

Chiemgau Thermen, Bad Endorf/Germany

SABBIA MED®

SUNSHINE, WARMTH AND LIGHT EVEN ON BAD WEATHER DAYS

Hotel Dorado Beach, Arguineguin/Spain

Spending time in the Sabbia Med® makes you feel like you're on holiday and is ideal for people who suffer from the winter blues, seasonal affective disorder. The system is also perfect for specific treatments, e.g. massages.

Even in the cold, dark season when the human eyes and skin only get a few rays of sunshine, our whole being needs a good dose of sunlight to function and maintain its balance. In Sabbia Med® your guests can top up on light, heat and that holiday feeling at any time, even in the winter.

A wonderful summer's day is simulated in Sabbia Med® – from sunrise to sunset. Clean, warm, light sand and gentle light with the pleasant intensity of a summer's day accompanied by subdued relaxing music let you forget grey days and the dark side of winter for a brief time.

Sabbia Med® offers constant brightness similar to daylight, gentle UV radiation and stimulates the metabolism. Spending time in Sabbia Med® is particularly recommended for people who suffer from the winter blues (seasonal affective disorder) as a result of its light therapy effect.

By the way, the room is also ideal for specific spa treatments, for example massages with that special flair.

The Sabbia Med® system is of course also available without sand. The light source can simply be integrated as an additional source in your relaxation area.

Useful information

Perfect lighting arrangement:

No irritating light for the eyes thanks to ideally arranged light sources and ceiling mirror to reflect light.

Customised design:

By designing the walls with illusionistic paintings or covering them with a whole variety of materials, coloured lighting module as well as customised programming.

Hygienic sand surface:

An integrated UVC sterilisation lamp ensures a hygienic sand surface.

Lucknam Park Luxus-Hotel & Spa Bath, Wiltshire/Great Britain

SALTWATER LIGHT ROOM

RELAX AND DO YOUR HEALTH A POWER OF GOOD

Atlantis Casino Resort Spa, Reno/Nevada by Spa Vision International USA

The saltwater light room is a unique relaxation room where your guests benefit from air containing minerals and the effect of their positive properties on your health while you relax. Added to this are the colour effects that provide additional relaxation

Useful information

Resistant to salt corrosion

The saltwater cascade is resistant to salt corrosion. Only saltwater resistant materials are used (e.g. integrated plastic basin).

Different stone surfaces

The cascade can be covered with different stone surfaces.

The air in the saltwater light room is enriched with precious minerals such as iodine, magnesium, calcium, bromine and iron. Inhaling this special air is highly recommended for people who suffer from respiratory problems, a weakened immune system, allergies or cardiovascular diseases.

Colour and its soothing, relaxing properties also play a major part in this exceptional relaxation room. A fascinating, atmospheric coloured light show is produced while the saltwater cascades down the wall.

The saltwater light room is also superb for small treatments (for example, foot baths, singing bowl massages, manicures or pedicures).

Hotel Almesberger, Aigen/Austria

GRADUATION HOUSE

SOOTHES YOUR GUESTS' AIRWAYS, GOOD FOR THE SKIN

A soothing, healthy setting for your guests

The graduation house is actually a system for salt production. The graduation house's wooden frame is filled with brushwood (whitethorn or blackthorn).

Today graduation houses are also a permanent fixture in the spa and wellness

sector and are used as relaxation rooms with a bonus. Inhaling the air enriched with salt has a soothing, healing effect on the airways and is good for skin irritations. Added to this there is the pleasantly woody fragrance in the graduation house that develops when the saltwater flows over the brushwood.

As a beautiful, white crystal curtain forms on the whitethorn brushwood over the course of time, the graduation house is also a spectacular sight. A pleasant and relaxing atmosphere that will impress your guests and where they can relax wonderfully between treatments.

LIGHT & SOUND RELAX

WITH SPECIAL LIGHT FUNNELS IN DIFFERENT COLOURS

Your guests benefit from the effect of colours while relaxing and are accompanied at the same time

Each colour has a very specific effect. For example, blue boosts concentration and has a positive effect on the vegetative nervous system. By contrast, green has a calming, relaxing and harmonising effect. The different effect of colours is also used with "Light & Sound Relax". We have created a special relaxation room with this where

your guests can relax all their senses with the help of different light and colour effects, quiet music and comfortable water beds.

The Light & Sound Relax Zone with special light funnel also fits into rooms with limited space without any major building works.

Hotel Dorado Beach, Arguineguin/Spain

Different colours in the Light & Sound Relax Zone

LIGHT ARRANGEMENTS

PUT YOUR ESTABLISHMENT IN A FAVOURABLE LIGHT

With our lighting arrangements you put your spa and wellness complex or individual rooms in a favourable light. The smart selection and positioning of light elements is one of the main reasons for why your guest feels comfortable or not. We will be happy to create a customised lighting

concept for you. From simple spotlights to coloured light or LED systems to glass fibre technology, we offer a wide range tailored to your requirements. For example, saunas, steam baths, the Rasul® or Salve-in-terra® can be fitted with a starry sky with Swarovski crystals or coloured light bars.

Ortoimplant Grupa, Zagreb/Croatia

SOFT-PACK® SYSTEM

RELAX IN AN ALMOST WEIGHTLESS STATE

A highly effective full body treatment plus cosy warmth, subdued light and moisturising oils or cremes, herbs, moor mud, algae, flowers or leaves that work their magic on the skin: that's the best way to describe the Soft-Pack® System.

The Soft-Pack® Original System from Haslauer has established itself as an international standard for highly effective full body treatments. 40 years ago the wellness pioneer Paul Haslauer developed this exceptional system together with rheumatologists to achieve a positive effect on diseases of rheumatological origin. Today it is hard to imagine the wellness and spa sector without the Soft-Pack® system.

How the treatment works: your guest lies comfortably in the Soft-Pack® system during the treatment and can relax in an almost weightless state. The body is wrapped in a special film. This has the advantage that the guest does not come into contact with water while the applied products (for example, moor mud, algae or special cremes) work their magic on the body. Due to the gentle water pressure the film caresses the guest's body so that the active ingredients can absorb perfectly into the skin (occlusion effect: the skin's ability to absorb active ingredients is increased ten-fold by this method)

Naturally a treatment can also take place in the Soft-Pack® system fully clothed without using any skincare products. The slowly rising temperature and almost weightless lying position have a positive effect on the musculoskeletal system and relax the body in the event of any rheumatic discomfort.

In addition there are a whole variety of treatment options. More than 40 recipes make the Soft-Pack® system a thrilling experience for your guest. However, it is also this special, totally different feeling of well-being that makes this spa system so unique.

Trust our decades of experience and our more than 40 years of superior knowledge. You can be certain: with the Soft-Pack® original system from Haslauer you are offering your guests an amazing full body treatment that is wonderfully relaxing for both the body and soul.

Useful information

Long life, the best materials:

Thousands of Soft-Pack® systems made from chromium nickel steel as base material have proved themselves day in day out all over the world in different practices and spas – for roughly 40 years now.

Special film:

Totally soft and supple, available in two different colours only from Kurland.

Individual designs:

Med, Day Spa, Pure or Sense Soft-Pack® system: select from a whole range of different versions. Covers are possible in classic Skai® leather or reinforced glass fibre plastic (GRP) and can also be made in wood, stone or tile versions (depending on the model). With the Day Spa, Pure and Sense versions you can choose from a range of 200 colours (RAL).

Ready to plug in delivery:

The Soft-Pack® systems have an integrated pump, do not need any compressed air and are supplied ready to plug in.

Easy to clean:

The Soft-Pack® systems are extremely easy to clean.

Economical:

Low maintenance costs due to lifting technology with integrated pump and high level of operational reliability with low running costs. Due to the low material consumption it is possible to use pure products (cremes, oils, moor muds, etc. without diluting them).

Instruction and support:

Technical instructions for assembly and support from our field service staff.

“MED” SOFT-PACK® SYSTEM

THE CLASSIC VERSION WITH SOFTLY PADDED EDGE

Four Seasons Resort Maui, Hawaii/USA by Spa Vision International/USA

The base material of the “Med” design is made of high quality chromium nickel steel and is available with two different lifting systems: with integrated pump (hydraulic) or with a compressed air system. Choose between two different sizes: 1.05 x 2.21 m or 1.05 x 2.36 m. This version is generally covered with easy to clean, robust Skai® leather but wood, tile or stone coverings are also possible.

The softly padded edge makes it extremely comfortable to get in and out of. That's why the “Med” Soft-Pack® system is the ideal version for therapy and spa areas, for doctor's surgeries and wellness facilities

Reiter Alm Spa & Wellness Hotel, Ainzring/Germany

“DAY SPA” SOFT-PACK® SYSTEM

ELEGANT, TIMELESS DESIGN WITH DURABLE GRP SURFACE

The Day Spa version of our Soft-Pack® system stands out due to its timeless, elegant design and looks particularly beautiful when it is free-standing in the room. This design's body is made of high quality glass fibre reinforced plastic (GRP), which makes the system durable and easy to clean. Naturally this model is also fitted

with the well-established technology of the “Med” Soft-Pack® system. Select the right model for your establishment from a large product range – 200 RAL colours. Our design experts will be happy to help you with your selection and show you the various options.

Reiter Alm Spa & Wellness Hotel, Aining/Germany

Hotel Narvil Conference & Spa, Serock/Poland

“PURE” AND “SENSE” SOFT-PACK® SYSTEM

OUR EXTRAVAGANT DESIGN MODELS

The “Pure” and “Sense” versions of our Soft-Pack® system impress due to their modern design. Linear or fancy: choose your favourite model to suit your taste. Both versions are fitted with a robust, durable and easy to clean GRP surface.

The standard “Pure” and “Sense” design is available in the colour “RAL 9010 pure white”. You can also choose other colours on request (200 RAL colours are available for this). Special finishes are also possible with the “Sense” Soft-Pack® system, for example extravagant pearl colours.

The “Pure” Soft-Pack® system is also available with four different wood surfaces (wild oak, alder, wengé, zebrawood) or stone veneer cladding. Another feature of the “Pure” model: the standard all-round LED lighting in white that provides exciting, unique light effects (also possible in a different coloured light at an extra charge).

The “Pure” model is available in two sizes: 1.17 x 2.42 m or 1.17 x 2.57 m. The “Sense” model is available in the size 1.13 x 2.47 m.

SOFT-PACK® SYSTEM – ADDITIONAL FEATURES

SOFT TOUCH STREAM JET TECHNOLOGY

Regardless of which Soft-Pack® model you choose you can equip each individual table with the innovative “Soft Touch” stream jet technology as an additional feature. Your guest’s back and shoulders are gently massaged underneath with a water jet at programmed

intervals. The resulting vibrations work deep-down in the body and also activate our inner organs. By the way, “Soft Touch” can also be used for short treatments without the guest having to get undressed. Pamper your spa visitors with this very special wellness experience.

SOFT MUSIC

Offer your guests a music experience during the treatment in the Soft-Pack® system, which is not just a treat for the ears but which can be felt with all your senses too. The Soft Music vibration generator including amplifier makes this possible. You can

put together your own music programme for your guests on the supplied MP3 player. Your guests’ individual music requests can also be met. A connection can be established between the vibration generator and MP3 player using a USB stick.

SAVAR SINNESPHONIE SOUND CUBE

Music is a question of taste. And therefore it’s not easy to find the right sound for all your guests while they are relaxing. With the “savar Sinnesphonie sound cube”, your guests can choose which music they want to listen to during the relaxation phase themselves and feel it with all their senses too. The heartbeat is slowed down by the oscillations and vibrations of the arrhythmic sound sequences (developed by scientists), which leads to deep relaxation, reduced stress levels and a wonderful feeling of security.

The cube works without a cable and can therefore be used flexibly anywhere, for example right next to the guest’s relaxation lounger.

BODY CONCLUSIO

PROBABLY THE SMALLEST STEAM BATH IN THE WORLD

Small but incredibly effective: The Body Conclusio, inspired by the rustic magic of an alpine hay bath, pampers the back and chest area with moist heat. As a result of its mobility, this aromatic steam bath is not only perfect for small wellness areas but also ideal for installation in hotel suites, gyms and therapeutic practices.

Often called the smallest steam bath in the world, the Body Conclusio can be used wherever you want it to be. Integrated castors make it mobile so it can be used anywhere. And hey presto your guests can indulge and do something good for their health. Herbal or Swiss pine shaving packs combined with moist heat pamper the back and chest area and lead to deep relaxation of the muscles. The essential oils rich in active ingredients in the packs are released due to the steam and stimulate the limbic system.

During the treatment the guest is covered in a special fleece which allows for the individual parts of the body to be perfectly humidified.

Other advantages of this unit are the low energy consumption and personnel costs as well as it being easy to clean.

Useful information

Circulation system:

The innovative air circulation system selectively and therefore ideally humidifies the body with moist heat.

Sensor:

The unit reacts using an integrated sensor. The treatment only starts once the guest takes their seat in the Body Conclusio. It ends automatically as soon as the guest stands up. That's why the unit has extremely low energy consumption.

Water tank:

The easy to refill water storage tank on the back of the unit has a capacity volume of 950 ml, which equals roughly two hours of continuous operation.

SWISS PINE LOUNGER AND KRAXENOFEN®

A WONDERFUL TRADITION FROM THE ALPS

The warm, comfortable sitting niches with Swiss pine shavings or aromatic alpine hay do the back a power of good and have a number of positive effects on health.

The hay bath is a well-established tradition from the Alps. Kurland has made a modern spa treatment out of this with the Swiss pine lounger and Kraxenofen®. When the guest is seated, heat rises through the hay pads and the essence of alpine hay spreads its scent from behind the comfortable heated seats, with the herbal mist softly stroking and relaxing the backs of your guests. The pelvic muscles are also gently warmed up. To maximise the benefits the guest is enveloped in a covering to retain the warmth and target the back and neck region during the experience.

The characteristic essence is released from the essential oils (coumarin) in the hay and has a soothing and invigorating effect whilst unblocking the respiratory passages in a miraculous way. Swiss pine on the other hand provides inner peace, improves physical and mental resistance, is good for concentration problems and tension and can help you to sleep well.

Easy handling makes the Swiss pine lounger and Kraxenofen® an interesting and valuable spa product.

Useful information

GRP body with integrated technology:

Easy and quick to assemble – can also be covered.

Light barrier:

A light barrier ensures that the system runs autonomously, which means low personnel costs and energy consumption.

Ideal before any massage:

As it gently warms up the back and neck muscles

Easy to clean and maintain:

Minimal cleaning costs as a result of the ready-made hay mats and Swiss pine cushions as well as easy to clean seats with GRP surface.

Versions with wheels:

The Kraxenofen® and Swiss pine lounger is also available as a mobile version with wheels. As a result, you can also use the unit quickly and easily anywhere in your spa complex.

ICE COLD REFRESHMENT

SNOWFALL TECHNOLOGY, ICE FOUNTAIN & MORE

Palpable refreshment after heat treatment including a sensational experience: offer your guests a cool-down unlike standard methods, for example a cold basin.

A cool-down in a snowfall shower will be remembered by your guests for a long time to come. Ice cold snowflakes gently fall onto your guest's hot body providing tingling, invigorating refreshment. It's really good for their health too as it stimulates the circulation, strengthens the immune system and firms skin.

The ceramic ice fountain is also a highlight for any spa and wellness area. Here your guests can rub themselves with crushed ice after a sauna or time in the steam bath. The ice

fountain is a refreshing experience but also a treat for the eyes too.

Naturally we offer you a whole variety of decorative showers, which enhance your relaxation rooms and also your spa and wellness complex's public areas. The focus is on individual design and solid materials, such as stone, ceramics or copper. Ask us about the variety of options for equipping your establishment with exceptional "refreshing oases".

Montenegro Stars Hotel Splendid 5* Conference & Spa Resort, Budva/Montenegro

Landhotel Golf & Salzano Spa, Interlaken-Unterseen/Switzerland

Useful information

Easy to install snowfall shower:

The snowfall technology is installed above the shower cubicle or in a suspended ceiling.

Special eye-catcher:

The snowfall technology can be attractively integrated into a shower with transparent walls as a special eye-catcher.

Ice machine for fountains:

The ice machine consists of a complete refrigeration system, adapted to the fountain's ice requirements. The ice vent transports the crushed ice to the fountain.

(EXPERIENCE) SHOWERS

WASHING AND COOLING DOWN – WITH SHOW EFFECT TOO

We offer showers in a whole range of different designs for your spa and wellness area. And we even have a number of experience showers in our range that offer your guests a real extra bonus. For example, are you already familiar with the snowfall shower?

Corner or circular showers, walk-in showers, semi-circular or pentagonal showers: we will find just the right one for you and make sure that the model you choose blends perfectly into your spa and wellness landscape. Customised solutions in terms of shape, design and function go without saying for us. We use handmade ceramics as well as mosaic and industrial ceramics to make our showers.

Would you like a shower for your guests that has more to offer than just the standard functions? In our repertoire you can also find a number of showers with sensational experiences, for example an ice mist, tropical or thunder rain shower including sound effects or our waterfall, bucket and snowfall models. Making showering an exciting treat for your guests!

MILL WHEEL SHOWER

A WONDERFUL REFRESHING EXPERIENCE

Reiter Alm Spa & Wellness Hotel, Airing / Germany

One extremely original way of freshening up is our mill wheel shower, which is driven by water power. Alternating hot and cold water showers are ideal between treatments. They are considered to be a well proven method of stimulating the circulation. Alternating hot and cold water stimulates the immune system, toughens you up and gives germs less of a chance. That's precisely why freshening up under our mill wheel shower is highly recommended.

The effectiveness of the shower is comparable to a Kneipp treatment. The mill wheel scoops water out of the tub and the alternately warm and cold water, apparently coming from the mill wheel shovels, pours out in intervals onto your guests, refreshing and revitalising them. The hot and cold water is in fact fed from their own pipes behind the mill wheel. Treat your guests to a wonderful, unique, refreshing experience that is good for their health at the same time.

WET MASSAGE TABLE

FOR LATHERING TREATMENTS, PEELS OR PANTAI HERBAL MESSAGES

Your guests enjoy maximum comfort while lying down and during the treatment with our wet massage table. The tables are multifunctional.

Our wet massage table is height adjustable and extremely stable so that guests can get on and off it safely. Other features are the circulating edge and ergonomically shaped, generous and pleasantly heated surface.

The hot and cold water shower head and drains allow you to shower your guests down on the table. Liquids also

drain away quickly. Our tables also have many advantages for therapists too: they can work comfortably without straining their back and at the same time they do not get wet during the treatments thanks to the table's perfect shape.

You can carry out many different treatments on one single table using our products: from the Oriental Hamam

soap lathering massage to various peels and the Kurland Pantai herbal massage.

There are also a number of options in terms of design, for example the exterior cover made from stone, tiles or wood customised to your establishment's requirements and style.

Useful information

Multifunctional

The wet massage table can be used for any wet massage, e.g. the Hamam soap lathering massage (ask about our Hamam sheeting too), body peels, the Kurland Pantai herbal massages and even Vichy showers.

Good for the back:

Height adjustable. Very stable surface and large range thanks to two lifting columns.

Easy and quick to clean:

The smooth, glass fibre reinforced surface is extremely simple to maintain, hygienic and easy to clean.

Reiter Alm Spa & Wellness Hotel, Aining/Germany

MASSAGE/BEAUTY THERAPY TABLES

YOUR GUESTS ARE DEFINITELY IN THE RIGHT PLACE HERE

A comfortable table is essential for a spa massage; the right beauty therapy chair is essential for a relaxing facial. With Kurland your guests are definitely in the right place, for example with the Savour Touch and Convertible Bed models.

Be it for a Sassi dei Vulcano massage with hot and cold stones, Pantai herbal and aromatic massages, Ayurvedic treatments or classic treatments: you will find exactly the right table here to treat your guests properly and offer them the best comfortable lying position.

You will also love our manicure, pedicure and beauty therapy chairs for facials.

Basic models or luxurious, electrically height adjustable massage tables as well as mobile models: we are guided entirely by what you want. There are also many options for the design. We

will be happy to put a tailor-made offer together for you.

By the way, we don't just have the perfect treatment table for you, we also provide you with appropriate treatment methods. We will be happy to inform you about special treatments and show you the latest offers from Kurland.

Our "Convertible Bed" is not just an extremely comfortable relaxation lounge but massages can also be carried out on it. Just as with the "Savour Touch" model. Both loungers are low, making them easy to get into, they have wide,

stable surfaces and can be adjusted for a whole variety of different sitting and lying positions. The individual cushions cradle the body perfectly in any lying position and provide stability along with maximum comfort. Thanks

to the special structure, the "Convertible Bed" and "Savour Touch" models' surfaces always have a pleasant temperature without being heated. We can also equip the Savour Touch massage table with an infrared system on request.

Useful information

A whole range of different designs:

Basic models, luxurious designs or mobile models: you can find the right massage or beauty therapy table for any requirements here. The design can be customised to your personal wishes.

Suitable treatment methods:

We not only supply the treatment table but will also be happy to advise you about suitable treatment methods. And we train your personnel in special treatment methods.

RELAXATION LOUNGERS

REST, RELAX, CHILL OUT

Resting after heat treatments and the application of Kurland oils is incredibly important. It normalises the cardiovascular system and allows oils to penetrate the skin more effectively. We have a number of comfortable loungers for your guests to relax and chill out in, e.g. Savour Touch, the Convertible Bed, the Swiss pine shavings bed or a whole variety of different water beds.

The quality of the relaxation lounge is incredibly important to make sure that your guest can relax all-round when resting after treatments. It's not just about whether the lounge is comfortable and the material feels pleasant against the skin. The temperature regulating effect of the lounge is also extremely important. Having been overheated, for example after a sauna, the body can be assisted in normalising its temperature again by resting afterwards on a perfect lounge.

Height adjustable, ergonomically shaped models, water beds, rocker and double loungers, relaxing swings and relaxation loungers that can also be used for treatments: take a look at our varied repertoire yourself. Our loungers are fitted with different features depending on the model, e.g. rests to elevate the legs, neck cushions, infrared light or electric drive.

Useful information

Designs to suit your taste:

Your establishment's relaxation room should harmonise perfectly with your wellness and spa area, no question about that. There are a number of options to realise your personal design requirements. By the way, Mediterranean and Asian relaxation areas are particularly popular at the moment. We will be happy to show you some recent examples.

BATHTUBS

THE GRAND KING'S BATHTUB OR MODERN DESIGNS

The centrepiece of our bathtubs is the nostalgic King's bath made from solid bell bronze. Plenty of space for two people to wonderfully relax. Besides this, we also offer other bathtubs in any required shape and size, customised to the style of your establishment of course.

The King's bathtub certainly lives up to its special name. The bathtub's nostalgic style, size and special shape make a bath a sensuous experience that is best enjoyed as a couple. In combination with

fine, dried herbs such as lavender and camomile, select flowers like roses and special salt and oil blends, your guests can bathe like former Kings and Queens – ostentatiously and in grand style. Naturally we are also the people to contact

when it comes to other designs. We have a number of bathtubs in our range that will blend perfectly into your establishment's ambience.

Mondorf Domaine Thermal, Mondorf-les-Bains/Luxembourg

SPA ACCESSOIRES

FOUNTAINS, FIRES AND MORE

Besides the effectiveness of a treatment, the visual appearance of your spa and wellness facilities is also crucial to your guests' well-being. Accessories play a major part in a harmoniously designed room.

With our spa accessories, for example decorative fountains, fires, ceiling ventilators and room elements, we place great value on style and unique design.

However, it is particularly important in the spa and wellness area that the accessories are not just eye-catching but also

provide value added due to how they work. Easy cleaning is just one of the many topics that play a part in the process. Our design department always keeps its eye on current trends and will be happy to show you the latest accessory ideas that will blend perfectly into your establishment's ambience and are also practical into the bargain.

Hotel Schreiberhof, Aschheim/Germany

APPLIANCES & ACCESSORIES

PERFECTLY EQUIPPED – DOWN TO THE VERY TINIEST DETAIL

Be it a professional creme mixer, portable skin diagnosis device, various appliances for warming up your products or for Pantai herbal treatments: we offer you top quality accessories that make therapists' everyday life a bit easier.

Permanent Contour® unit, compressor heater, preparation unit for Pantai Luar® herbal bundles, built-in product preparation device, warming device for basalt stones, foils and towels for treatments, brushes and

much more: you can find a large selection of suitable equipment for your treatments. For detailed information about the individual products in our range please visit our online shop: www.kurland.info

Lindhotel Golf & Salzano Spa, Interlaken-Unterseen/Switzerland

THE RIGHT DESIGN FOR YOU

ASK OUR EXPERTS

Are you interested in our offers but don't really have an exact idea of how these unique systems and equipment can be integrated into your establishment? Ask our spa design experts who will be happy to draw up a suitable concept for you.

In the spa and wellness industry, design shouldn't just be beautiful and convey a wonderful atmosphere, it has to be practical too. Functionality, easy to clean, simple maintenance and durability go hand in hand with an attractive look.

Our Spa Design department is a strong partner with decades of experience to assist you in fulfilling these high requirements in your establishment. Close cooperation with archi-

itects, continuous trend and market research as well as an eye for exceptional systems and equipment are always right at the fore with our work.

Whether you want a large spa oasis to be redesigned or individual, maybe even really small areas to be fitted with new systems and equipment: trust in our expertise.

YOUR PLANNING & DESIGN BONUS

WE WAIVE THE PLANNING COSTS UPON COMPLETION

Trust the Kurland planning professionals. Following the initial non-binding phone call you receive written advice and an informative, detailed concept from us. Tailored totally to your personal wishes and requirements. If this concept is then finally realised, the planning

costs are reimbursed to you or deducted from the final price on completion. The planning costs for a spa & wellness area of up to 20 m² amount to EUR 290. We charge EUR 580 for areas up to 50 m². We will be happy to provide you with a non-binding, tailor-made quote for larger areas.

Technical Support

Although our devices, systems and equipment are high-tech products, we still guarantee the simplest handling and maintenance. For example, our systems have a touchscreen panel or control with LCD panel that makes centralised control possible. In addition,

we use energy-saving technologies and place great importance on high efficiency and low susceptibility to failure. If problems should arise despite this, then our technical support team is there to support and assist you by phone. You can reach us on: +49 (0)8654/4887-48.

FAX Germany: +49 (0) 8654 48 87-55 | FAX Austria: +43 (0)662 82 17 40

KURLAND SKINCARE PRODUCTS

FOR THE BEST TREATMENT OF YOUR GUESTS AND CUSTOMERS

The name Kurland does not only stand for the development of exceptional spa worlds combined with revolutionary therapeutic treatments. We also offer a unique range of natural skincare products to treat your guests.

Herbs, medicinal plants and flowers, choice fruits, rich moorland muds, high-quality oils, goats' butter or salts and algae from the sea: we have combined all of these precious raw materials with the latest technology, just for you. Moreover, we have decades of experience in creating practical, effective

recipes, an unbroken spirit for research and the strictest quality criteria.

The result is products for skincare and treatments that can do a great deal for your guests and customers' health and well-being. That care for the body gently and intensively. Alleviating everyday ailments. Simply making life easier and good. Take a voyage of discovery through our great range in our online shop at www.kurland.info. Or request our free „Professional Care“ product catalogue by email at: info@haslauer-gmbh.de

KURLAND TRAINING CENTER

COURSES TO DO WITH SYSTEMS AND EQUIPMENT

In our courses and workshops, e.g. introduction to the Soft-Pack® system, you get to know how to professionally handle the systems and equipment, about the effective use of Kurland products and different possible applications. You receive an all-inclusive service with everything from one source, perfectly coordinated with each other. You

can book all our courses as in-house training at your establishment too. This means: we will be happy to come to you and train you and your staff on site. Find out about what we are currently offering online at: www.spa-ausbildung.info
